## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 2-41 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches a reflection-type liquid crystal device and a manufacture process comprising various elements and steps, more specifically, as the following:

the polymeric medium is composed of a silver-containing polyimide, and the polyimide containing the fine silver particles formed by reduction of monovalent silver [claims 2 and 30];

the light reflector section has a light reflector layer formed from a silver-containing photosensitive polymeric medium according to a photolithographic process, and the light reflector layer contains the fine silver particles so precipitated as to give electrical conduction through their mutual contact [claim 7];

the manufacture of making process comprising applying mixture containing monovalent silver and photosensitive polymeric medium, exposing the mixture to light, and precipitating fine silver particles on the surface of the light reflector layer [claims 18-19].

The closest references US 6,229,586 (Date et al), US 6,219,120 (Sasaki et al) and US 6,414,734 (Shigeta et al) disclose a reflection-type liquid crystal display device having laminated reflector section (polyimide orientation film and reflection film) in which the reflection film is made of silver and the polyimide orientation film control the

orientation of the molecules. However, the prior art of record do not disclose the silver-containing polyimide forming the light reflector layer and using mixture containing monovalent silver and the photosensitive polymeric medium (polyimide) forming the light reflector layer as claimed in claims 2, 7, 18, 19 and 30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
